EMPLOYMENTS

Current MAY 2017	Software developer, OMEGAPOINT GÖTEBORG AB Gothenburg, Sweden **Projects**: Volvo On Call for next generation cars - Volvo Car AB, In-Car apps - Volvo Car AB
Current NOV 2013	Software developer, SELF-EMPLOYED Gothenburg, Sweden Part time IT consultant. As an self-employed IT consultant, I have gained the mindset of putting the client in focus and deliver solutions based on their needs. **Projects**: Webscraper for realtor - Savills Sweden AB, WrapMyInfo a secure RESTful backend - WrapMyInfo & Web aplication used for results - SSS Arrangemang AB.

EXPERIENCE

Current MAR 2020	*Cloud for car manufacturers*, WIRELESSCAR SWEDEN AB Gothenburg, Sweden Technologies: Java WirelessCar
MAR 2020 — DEC 2018	*Volvo On Call for next generation cars*, VOLVO CAR AB Gothenburg, Sweden Technologies: C++, Swift, Kotlin Part of a cross functional feature team that was in charge of developing features such as heater start/stop, remotely trigger car updates and scheduling of climatization in car. The team developed both the mobile apps for Android and iOS, as well as the telematics software running in the car.
DEC 2018 — SEP 2017	*In-Car apps*, VOLVO CAR AB Gothenburg, Sweden Technologies: C++, JavaScript, Qt Development of the Volvo Cars In-Car apps such as Internet Maps, Weather, Glympse and more. As most apps where already in production, daily tasks consisted of bug fixes and continuous improvements. Participated in rewrites of several of our apps to utilize more C++ for performance reasons.
Current OCT 2015	*Webscraper for realtor*, SAVILLS SWEDEN AB Gothenburg, Sweden Technologies: Python, SQLite An application to scrape information about listed estates from the realtors customers. The application compiles an Excel-sheet with all estates available for rent as well as the changes from previous run. The code was written in Python. This project gave me experience in communicating with and deliver to clients.
DEC 2015 — AUG 2015	*A secure RESTful backend*, WRAPMYINFO Gothenburg, Sweden Technologies: JavaScript, Node.js, PostgreSQL Single developer of a backend for a start up with the business to store userdata for customers. The code is written in JavaScript / Node.js, using Express.js and the database PostgreSQL. This project have increased my technical knowledge as well as my ability to deliver on a deadline.
DEC 2017 — NOV 2013	*Web aplication used for results*, SSS ARRANGEMANG AB Stenungsund, Sweden Technologies: PHP, Laravel Project lead, lead developer in a team of three, with the scope of 1500 hours. I worked with the back end in PHP and used the framework Laravel. I also took responsibility in keeping the service running. This project have increased my confidence in communication with clients, deliver software that works as intended and knowledge in managing services.

EDUCATION

2017 — 2015	*Computer System and Networks*, CHALMERS UNIVERSITY OF TECHNOLOGY Gothenburg, Sweden Main subjects: Security and Distributed Systems Thesis: "A Security Policy for Web Navigation" — Advisor: Daniel Hausknecht
2015 — 2012	*Information Technology*, CHALMERS UNIVERSITY OF TECHNOLOGY Gothenburg, Sweden Thesis: "Security in close proximity systems" — Advisor: Pierre Kleberger
